Ponorogo Regency, East Java

SUMMARY

I am a graduate of Geomatics Engineering from the Sepuluh Nopember Institute of Technology with experience in data analysis, dashboard development, machine learning, and data-based systems. Experience processing, cleaning, analyzing, and visualizing data using Python, SQL, Excel, and Power BI to generate insights that support business decision-making. He has experience as a Data Analyst and Data Scientist in the development of HR Business Dashboard, predictive analytics, and geospatial data-based distribution systems, with the ability to translate complex data into actionable insights.

EDUCATION

Institut Teknologi Sepuluh Nopember (ITS) — Surabaya, Indonesia

Bachelor of Geomatics Engineering | August 2020 – February 2025

GPA: 3.06/4.00

TECHNICAL SKILLS

- **Programming & Database:** Python, R, SQL, MATLAB, Java, Node.js, PostgreSQL (PostGIS).
- **Visualization & Business Intelligence:** Microsoft Excel, Tableau, Microsoft Power BI.
- **Geospatial & Engineering Software:** ArcGIS, QGIS, AutoCAD, PostgreSQL (PostGIS), Agisoft Metashape, Surpac.
- **Web Development Fundamentals:** JavaScript, HTML, CSS.
- **Productivity & Office Tools:** Microsoft Office Suite (Word, PowerPoint, Excel).
- **Machine Learning & Analytics:** Exploratory Data Analysis (EDA), Data Cleaning, Data Preprocessing, Data Visualization, Predictive Analytics, Machine Learning.

LICENSES & CERTIFICATIONS

- AI-900: Microsoft Certified Azure AI Fundamentals, Microsoft.
- Data scientist, Dicoding.
- Safety Construction Junior Expert, BNSP.
- Drone Remote Pilot Certification, APDI (Indonesian Drone Pilots Association)
- Data Science Training Participant, Pusdatin of the Ministry of Education (is running and ends in August).

PROJECT

Modeling of Literacy and Numeracy Achievement in Elementary Schools in Java, Pusdatin of the Ministry of Education — Data Scientist | Final Project Training | May 2026 — Aug 2026

- Develop an AI-based product recommendation system to provide personalized recommendations to customers based on their preferences and purchasing behavior.
- Analyze sales data and customer behavior to help resellers determine promotional strategies.
- Build product demand prediction models to support stock optimization and reduce the risk of overstock.
- Implement data-driven solutions using Python and machine learning to improve business decision-making.

HR Business Dashboard, Dicoding — Data Scientist | Final Project Certification | Mar 2026 — Apr 2026

- Perform cleaning, transformation, and preprocessing of employee data, including handling missing values and processing attrition status using Python.
- Develop HR KPI dashboards to monitor total employees, resignation trends, and attrition rates.
- Conducting Exploratory Data Analysis (EDA) to identify the main factors causing employee attrition.
- Identify positions and departments with high turnover risk.
- Develop a predictive model using the Random Forest algorithm to analyze feature importance.
- Build data-driven insights to support HR decision-making.
- Project access: <https://datascienceproject-ja5ymavaprmwqbxsyqvjm.streamlit.app/>

Early Detection System for Student Dropouts, Dicoding — Data Scientist | Final Project Certification | Mar 2026 — Apr 2026

- Conduct Exploratory Data Analysis (EDA) to identify the main factors influencing student dropout risk based on academic performance and demographic characteristics.
- Clean, transform, and preprocess student data, using Python.
- Develop a Machine Learning model using the XGBoost algorithm.
- Develop an interactive dashboard to analyze academic performance, student trends, and dropout risk factors.
- Develop data-driven insights and early intervention recommendations based on predictive analysis results to support educational decision-making.
- Project access: <https://datascienceproject2-ls8yctqjaculgtx6fcd3fa.streamlit.app/>

WORK EXPERIENCE

Geological Agency — *Land Surveyor and Geodynamic Data Analyst* | Contract | May 2024 — Dec 2024

- Conduct GNSS surveys and field team coordination for high-precision geospatial data collection.
- Processing and analyzing GNSS data using Linux-based GAMIT/GLOBK.
- Visualize and validate the quality of GNSS data through Signal-to-Noise Ratio (SNR) and Skyplot analysis.
- Interpret the results of geospatial analysis to support the identification of data-based soil deformation patterns.

Sepuluh Nopember Institute of Technology — *Research Assistant* | Apprenticeship | Nov 2023 – Dec 2024

- Processing survey data from the Geospatial Information Agency using GAMIT software on Linux.
- Making a Probabilistic Seismic Hazard Analysis of Earthquakes in Lampung Province.
- Create maps using Software Generic Mapping Tools by creating a map data plotting program from the results of spatial processing and analysis.

ATR/BPN Surabaya 1 — *Cadastral Surveyor* | Internship | Aug 2023 – Sep 2023

- Conducting a cadastral survey in the separation of land certificates.
- Make a plot from the results of a field survey.
- Create a data archive in each location of land parcels that have been certified.
- Separate land certificates and explain how agrarian law in the measurement of land plots.

LEADERSHIP ACTIVITIES

Geodesy and Geodynamics Laboratory, Surabaya City — Laboratory Assistant | Nov 2023 — Dec 2024

- Participate in academic projects.
- Research activities.
- Teamwork-based tasks.

ITS Geomatics Student Association, Surabaya City — *Geocentric Event Staff* | Oct 2021 — Aug 2024

- The person in charge of the ITS Geomatics Engineering graduation ceremony 2022.
- Create event documentation.
- Design sponsorship proposal design.
- Voice the regulations of regeneration and assembly.

Community service, Ponorogo Regency — *Public Relations* | Jun — Aug 2022

- Installing solar power plants with an on-grid system.
- Connect the service team with the local community.
- Providing insight into solar power plants to the community.
